Biotechnology and Bioengineering

INDEX TO VOLUME 59

ISSUES 1–6

July 1998–September 1998

Biotechnology and Bioengineering

Editor
Douglas S. Clark
Department of Chemical Engineering, University of California
201 Gilman Hall, Berkeley, CA 94720-1462

Associate Editors

James D. Bryers
University of Connecticut
Farmington, Connecticut

Pauline Doran
University of New South Wales
Sydney, Australia

Jonathan S. Dordick
University of Iowa
Iowa City, Iowa

George Georgiou
University of Texas
Austin, Texas

Jeffrey A. Hubbell
ETH—Zürich and
University of Zürich
Zürich, Switzerland

Maria-Regina Kula
Heinrich-Heine Universität
Düsseldorf
in der KFA Jülich, Germany

Lee R. Lynd
Dartmouth College
Hanover, New Hampshire

Eleftherios T. Papoutsakis
Northwestern University
Evanston, Illinois

John Villadsen
Technical University of Denmark
Lyngby, Denmark

Editorial Board

James E. Bailey
ETH–Zürich
Zürich, Switzerland

Harvey W. Blanch
University of California
Berkeley, California

Isao Karube
University of Tokyo
Tokyo, Japan

Bernhard Ø. Palsson
University of California at
San Diego
La Jolla, California

Michael L. Shuler
Cornell University
Ithaca, New York

Daniel I.C. Wang
Massachusetts Institute of
Technology
Cambridge, Massachusetts

Founding Editor: Elmer L. Gaden, Jr., *University of Virginia, Charlottesville, Virginia*

Biotechnology and Bioengineering (ISSN: 0006-3592) Volumes 57–61 are published 28 times a year, semi-monthly, except tri-monthly in February, May, August, and November, by John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Copyright © 1998 John Wiley & Sons, Inc. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under section 107 or 108 of the 1976 United States Copyright Act, without written permission of the publisher, authorization through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, 508-750-8400, fax (508) 750-4470. Periodicals postage paid at New York, NY, and at additional mailing offices. The Combinatorial Chemistry section, vol. 61 (1–4), will be sent via standard mail.

The code and copyright notice appearing at the bottom of the first page of an item in the journal indicates the copyright holder's consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 and 108 of the United States Copyright Law. The per copy fee for each item is to be paid through the Copyright Clearance Center. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept.

Subscription Price (Volumes 57–61, 1998): $2635.00 in US, $2915.00 in Canada and Mexico, $3125.00 outside North America. All subscriptions outside US will be sent by air. Personal rate: $445.00 in US, and $613.00 outside North America. *Combinatorial Chemistry* section personal rate: $145.00 in US, and $169.00 outside North America. Subscriptions at the personal rate are available to individuals. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. For subscription inquiries, please call (212) 850-6645, E-mail: SUBINFO@wiley.com

Postmaster: Send address changes to Biotechnology and Bioengineering, Caroline Rothaug, Director, Subscription Fulfillment and Distribution, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158.

Advertising Sales: Inquiries concerning advertising should be forwarded to Advertising Sales, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158, (212) 850-8832. Advertising Sales, European Contacts: Bob Kern or Nicky Douglas, John Wiley & Sons, Ltd., Baffins Lane, Chichester, West Sussex PO19 1UD, England. Tel: 44 1243 770 350/367, Fax: 44 1243 770 432, e-mail: adsales@wiley.co.uk.

Reprints: Reprint sales and inquiries should be directed to the Customer Service Department, John Wiley & Sons, Inc., 605 Third Avenue, New York, NY 10158. Tel: (212) 850-8776.

Manuscripts for *Biotechnology & Bioengineering* should be submitted to the Editor, Professor Douglas S. Clark, Dept. of Chemical Engineering, University of California, 201 Gilman Hall, Berkeley, CA 94720-1462. **Manuscripts** for *Combinatorial Chemistry* should be submitted to the Editor, Dr. David J. Ecker, Isis Pharmaceuticals, Inc., 2292 Faraday Avenue, Carlsbad, CA 92008.

All Other Correspondence: Address to Biotechnology and Bioengineering, Publisher, Interscience Division, Professional, Reference, and Trade Group, John Wiley & Sons, Inc., 605 Third Ave., New York, NY 10158.

Information for Contributors appears in the first and last issue of each volume. The contents of this journal are indexed or abstracted in Biological Abstracts, BIOSIS, Chemical Abstracts, Chemical Titles, Current Contents/Life Sciences, Current Contents/Agriculture, Biology, and Environmental Science, Engineering Index, Excerpta Medica, Research Alert (ISI), Science Citation Index (ISI), and SCISEARCH Database (ISI).

Biotechnology and Bioengineering
Subject Index to Volume 59

Acetic acid fermentation, 310
Acetoin, 640
α-chymotrypsin, 553
Active site accessibility, 364
Activity, 318
Activity coefficients, 163
Adenoviral vectors, 567
Adenovirus, 567
Adsorption, 451, 651
Adsorption isotherm, 621
Agitation, 762
Airlift reactor, 705
Alcohol inhibition, 163
Alcoholysis, 62
Algae, 605
Algal growth, 705
4-alkylphenols, 171
Alternating potential, 374
3-amino-1,2,4-triazole, 156
Amino acids, 90
α-amylase inhibitor, 695
Anaerobic, 732
Anaerobic/microaerobic conditions, 400
Anoxic filter, 52
Antibody fragments, 517
Antisense, 445
AOT, 471
Apoptosis, 90
Aqueous two-phase separation, 461
Aqueous two-phase systems, 73
Artificial neural network (ANN), 189
Artificial seed, 635
Aspergillus niger, 407
Astaxanthin, 501

Bacillus subtilis, 227
Baculovirus expression vector system, 178
Basidiomycete, 525
bcl-2, 90
β-Galactosidase, 178, 294
Biochemical reaction networks, 239
Biodegradation, 393, 482
Biodegradation kinetics of mono-chlorobenzene, 328
Biofilm, 261, 318
Biofilm reactor, 80
Biofilm thickness, 80
Biofilms, 302
Biofilter model, 40
Biofiltration, 328
Biomass measurement, 647
Biomass separation, 647
Bioprocess control strategy, 379
Bioreactor, 351, 679
Bioreactors, 714
Bioremediation, 21, 438, 507, 520
Bioseparations, 557
Biotrickling filter modeling, 328
Biotrickling filters, 328
Bulk polymerization, 428
2,3-butanediol, 640

Calorimetry, 428
Candida antarctica, 495
Catabolite repression mutants, 203
Catalase, 156, 714
Catalytic membranes, 108
$CD34^+$ cells, 534
CDC28 expression, 203
Cell adhesion, 2
Cell binding, 294
Cell culture, 90
Cell cycle behavior, 203
Cell death, 90
Cell density, 261
Cell harvesting, 189
Cellobiohydrolase, 621
293 cells, 567
Cellulase, 621
Cellulose, 651
Cellulose hydrolysis, 621
Central metabolism, 28
Chemometrics, 131
Chemostat, 587
Chemostat and batch cultures, 203
Chemostat culture, 28, 407
Chloramphenicol Acetyltransferase (CAT), 248
Chlorella vulgaris, 605
Chlorinated VOC emissions, 328
CHO cells, 445
Chymotrypsin, 360
Citric acid, 344
Closed fermentation system, 310
Coculture, 576
Colloidal gas aphrons, 471
Comamonas, 507
Comomonas, 21
Competing species, 116
Complex coacervation, 635
Composite membrane, 451
Conductive paint electrode, 374
Continuous culture, 99
Continuous extraction of product, 73
Corn stover, 419
Covalent flavoprotein, 171
18-crown-6, 553
Culture Redox Potential (CRP), 248
Cultured epidermal autografts, 679
Cyclic fed-batch culture, 379

Denitratification, 52
Denitrification, 393
Denitritification, 52
Desulfovibrio vulgaris, 732
Dichlorophenol degradation, 438
Diffusion, 214
Diffusion coefficient, 261
Direct esterification, 495
Distributed fraction of reductase, 52
Dithiothreitol (DTT), 248
Dynamical analogy, 116
Dynamics, 544

Effective diffusion coefficient, 80
Effective diffusive permeability, 261
Effective diffusivity, 302
Electric current density, 344
Electrochemical partitioning, 461
Electrodialysis, 344
Elemental balancing, 605
Enantioselectivity, 171
Encapsulation, 214, 635
Endoglucanase, 621
Enzymatic, 68
Enzymatic peptide synthesis, 553
Enzyme, 419
Enzyme activities, 28
Enzyme conformers, 122
Enzyme loading, 364
Enzyme stability, 360
Enzymes, 163, 428, 747
ER membrane translocation, 286
Escherichia coli, 248, 386, 612, 754
Ester, 62
Esterase, 582
Esterification, 62, 747

Eucalyptus globulus, 501
Evaporation losses, 310

F plasmid, 659
Faraday efficiency, 344
Fed-batch, 386
Fed-batch cultivation, 400
Fed-batch culture, 178
Feed solute concentration, 344
Fermentation, 525, 576, 640
Fiber, 651
Fibroblasts, 2
Filtration, 451
Fishing net, 374
Fixed-film bioreactor, 40
Flavour esters, 122
Flocculation, 647
Flow cytometry, 612
Fluid mechanical stress, 612
FMDV, 294
Folic acid, 227

G1 length, 203
Gel, 651
Gene engineering, 239
Gene expression, 666
Genetic recombination, 582
Glucoamylase (GAM), 407
Glycerol dissimilation, 544
Glycolysis, 203
Glycosidases, 747
Glycosides, 747
Glycosylation engineering, 445

H_2O_2 decomposition, 714
Haloalkane dehalogenase, 520
Heat denaturation, 273
Heat shock, 248
Hematopoietic cell culture, 534
Heterologous protein expression, 379
High density, 351

High-density cultures, 605
HOCl pretreatment, 714
Hybridoma, 90
Hydrogen cycling, 732
Hydrogen exchange, 144
Hydrogen peroxide, 156
Hydrolysis, 419
Hydrophobilization, 582

Image analysis, 762
Iminodiacetic acid, 695
Immobilization, 651
Immobilized enzymes, 73, 684
Immobilized metal affinity precipitation, 695
Immobilized mixed culture, 21
Immunomagnetic cell separation, 10
Improvement of rice α-amylase productivity, 379
Impurities, 776
Impurity analog, 595
In vitro and in vivo enzyme activities, 544
